CRUD WITH sql and sql driver pgx v5

```
package main

import (
      "database/sql"
      "fmt"
      "log"
      "net/http"

      _ "github.com/jackc/pgx/v5/stdlib"
)

func users(w http.ResponseWriter,r *http.Request){
      fmt.Fprintln(w,"hellow")
}

func main(){

 dsn := "postgres://postgres:xxxx@localhost:5432/name"
 db,err:=sql.Open("pgx",dsn)

 if err!=nil{
      log.Fatal(err)
 }
 defer db.Close()

 if err:=db.Ping(); err!=nil{
      log.Fatal(err)
 }
 fmt.Println("Connection success fulll")

      mux:=http.NewServeMux()
      mux.HandleFunc("/user",users)

      server:=&http.Server{
            Addr: ":8000",
            Handler: mux,
      }

      fmt.Println("Server is live at 8000")
      server.ListenAndServe()
}
```
