```
package database

import (
	"fmt"
	"context"
	"github.com/redis/go-redis/v9"
)

func ConnectRedis()*redis.Client{
	rdb:=redis.NewClient(&redis.Options{
		Addr: "localhost:6379",
		Password:"xxxx",
		DB: 0,
	})
	_,err:=rdb.Ping(context.Background()).Result()
	if err!=nil{
		panic(fmt.Sprintf("Failed to connect to Redis: %v", err))
	}

	fmt.Println("Redis connected successful")

	return rdb
}
```
